Hello dear readers,

Thank you for sticking through with us to the

end of 007!!!! I am so grateful I got to join this project ^^

Even though I stepped in midway through... And only translated Gish chapters...

I'm sorry to say, I have never read 007. I was asked to join the project when our previous translator decided to step down from the project, and with the help of our beautiful and amazingly kind team members, Jofiant and Ladybug, I managed to pull through! (Especially when I have no idea who's who and what is going on...) Those two are amazing! They even made me a 007 wiki- complete with character information and each chapter's summary! They did this overnight! Isn't that amazing!? Give them all of your thanks!!! They worked so hard for this project!!

I plan on reading this series one day... Especially since I managed to help see it to the end. I loved talking to everyone about this series especially some of our team's reactions to Kuze's little antics, lol.

This is my first project with Timeless and my first completed project with Timeless. Thank you Timeless Scans for letting me into this amazing family. Thank you readers for accepting my translations and reading our work!

I hope to see everyone else in another project ? Please keep supporting us and the original creator! \o/!

Translator, Azure
